Replacement filtration available in Standard 5 Micron & Enhanced .5 Micron

Filter
changes in
less than 20
seconds

Part of PerformanceCare +
by forespar

What could be simpler than the installation of a drinking water faucet with above-counter filter changes and the full protection offered by activated carbon filtration? This unique water filter does not require under-counter access or the clutter of filters and tanks typical of other water purification systems. With just a simple quarter turn at the faucet, the filter lifts out, slips off, and receives the new filter. In less than 20 seconds, it is ready to produce purified water.

PureWater+™ by forespar®

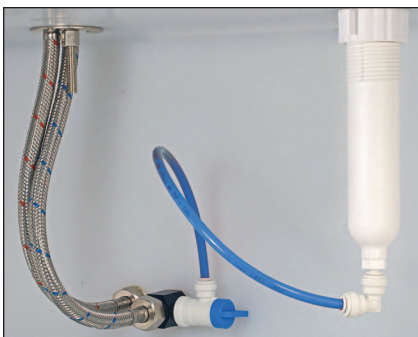

The new *PureWater+* by Forespar® combines space-saving sensibility with ease-of-use filter changes through a patented quick-connect design all performed above the countertop. The *PureWater+* does not require under-counter filter access or a reservoir apparatus similar to other plumbed-in water purifiers, all with the full protection of carbon-block filtration.

Available Products:

- 770295 **PureWater+ All-In-One Clean Water Kit**
- 770297-1 **PureWater+ 5 Micron Replacement Filter**
- 770298-1 **PureWater+ 0.5 Micron Enhanced Filter**
- 770297-2 **PureWater+ 2-Pack 5 Micron Replacement Filters**
- 770298-2 **PureWater+ 2-Pack 0.5 Micron Enhanced Filters**

The *All-In-One Clean Water Kit* includes parts and instructions making installation easy.

The *PureWater+* system is compact and easy to install. No mounting bracket needed.

Once installed, filter changes are made from above the counter.

Pure water has never been so simple™
